I completely support xm radio. I own 2 receivers and only listen to xm radio. I live in an area where radio reception is awful and xm gives me the news, weather and variety of music that I love. I also have an autistic child who picks up things he hears. We all know on fm radio you cannot control what is said any more. Xm offers stations geared towards children. I don't know how I would live without xm and the variety it offers. THANK YOU
